- 11:09 pm **DeborahMersino:** Happy to have everyone here! What are your questions? #gtchat
- 11:10 pm **DeborahMersino:** @Ijconrad - Most programs consider more than just the score (they should). #gtchat
- 11:10 pm **DavidsonGifted:** @DeborahMersino Thank for posting Deborah. Here is another with a bit more detail for those new to GT: <http://bit.ly/bUKB40> #gtchat
- 11:10 pm **Boz23:** #gtchat IQ measures your ability to complete meaningless tasks in a time-monitored environment. Doesn't identify many gifted kids.
- 11:10 pm **Boz23:** #gtchat IQ is useful for some research and not much else.
- 11:11 pm **rugcernie:** @cybraryman1 #gtchat They were part of eugenics in its early stages.
- 11:11 pm **DeborahMersino:** @Ijconrad According to Silverman, parents are excellent identifiers of giftedness in their children. See earlier post / 84%. #gtchat
- 11:11 pm **DeborahMersino:** RT @DavidsonGifted: @DeborahMersino Thank for posting Deborah. Here is

another with a bit more detail for those new to GT: <http://bit.ly/bUKB40> #gtchat

- 11:12 pm **ljconrad:** @DeborahMersino In the recent past our dist used this to deny services. Getting better in last 2 yrs #gtchat
- 11:12 pm **cybraryman1:** RT @DeborahMersino: @ljconrad - Most programs consider more than just the score (they should). #gtchat
- 11:13 pm **chrstinef:** @ljconrad It is not considered best practice - so I'm glad your ditrict is changing. #gtchat
- 11:14 pm **DeborahMersino:** @Boz23 - Good to see you! NAGC cites that "IQ scores only give info. about one specific facet of intelligence..." #gtchat
- 11:14 pm **FrazzIld:** Agree, IQ can have little bearing on giftedness but may be the only way to "prove" giftedness to a teacher. No school progs here #gtchat
- 11:14 pm **DazzIld:** I'm curious about test ceilings, WISC-III in particular. What is a ceiling and what does it indicate? #gtchat
- 11:15 pm **DeborahMersino:** @Boz23 - However, when administered properly and utilized w/other criteria, they can be helpful in advocacy efforts/proper ed. #gtchat
- 11:17 pm **DeborahMersino:** @FrazzIld - This article by Julia Osborn posted on @HoagiesGifted discusses low ceilings. <http://bit.ly/9eaTyU> #gtchat
- 11:17 pm **GaryBrannigan:** Any test is only as good as the person administering, scoring and interpreting it. #gtchat
- 11:17 pm **cybraryman1:** RT @DeborahMersino @Boz23 When administered properly & utilized w/other criteria, they can be helpful in advocacy efforts/proper ed. #gtchat
- 11:17 pm **chrstinef:** RT @GaryBrannigan: Any test is only as good as the person administering, scoring and interpreting it. So true! #gtchat
- 11:18 pm **DeborahMersino:** @DazzIld - Sorry, my last tweet should have been directed to you (re low ceilings). #gtchat
- 11:18 pm **FrazzIld:** So true! RT @GaryBrannigan: Any test is only as good as the person administering, scoring and interpreting it. #gtchat
- 11:19 pm **DeborahMersino:** There is also a big difference between IQ Testing & assessments. The Carolyn K. articles discuss this (esp. group assessments). #gtchat
- 11:20 pm **GaryBrannigan:** Examiners need to be knowledgeable about giftedness, and be able to fill up the white space with their observations #gtchat
- 11:20 pm **DazzIld:** @DeborahMersino Thanks, got that! And it mentions a problem with low ceilings on the test used for my son (WISC-III) #gtchat
- 11:20 pm **DeborahMersino:** Regarding the when, Dr. Linda Silverman indicates the ideal age for testing is b/w 5 & 8 1/2 years. #gtchat
- 11:20 pm **chrstinef:** RT @DeborahMersino: There is also a big difference between IQ Testing & assessments. The Carolyn K. articles discuss this #gtchat
- 11:20 pm **DavidsonGifted:** I believe the ceiling on the WISC III is 160 for full scale IQ. Correct me if I am wrong. WISC IV does have extended norms option #gtchat
- 11:20 pm **Boz23:** #gtchat Hi back Deborah. Sometimes IQ is good for advocacy but parents can place too much emphasis and use it as an excuse for behaviour.
- 11:20 pm **chrstinef:** @GaryBrannigan This can be a challenge sometimes...as most are not trained in giftedness #gtchat
- 11:20 pm **DeborahMersino:** Dr. Silverman also notes brothers and sisters are usually within five to ten points in measured ability. #gtchat
- 11:21 pm **chrstinef:** @DavidsonGifted that is correct #gtchat
- 11:21 pm **FrazzIld:** In Ireland, GT not much recognised. Can be difficult to get a psych who understands the idea of giftedness #gtchat
- 11:21 pm **DazzIld:** RT @chrstinef: @GaryBrannigan This can be a challenge sometimes...as most are not trained in giftedness/ It's a niche market. Tell #gtchat

- 11:22 pm **DavidsonGifted:** Hoagies Gifted does a great job explaining ceiling effects: http://www.hoagiesgifted.org/highly_profoundly.htm #gtchat
- 11:22 pm **GaryBrannigan:** @chrstinef Good point about lack of preparation in examiners. #gtchat
- 11:22 pm **DeborahMersino:** @Boz23 - You'll get no argument for me on that one; however, intensities and overexcitabilities are factors & need support. #gtchat
- 11:23 pm **DeborahMersino:** @Boz23 - IQ tests can also be helpful in identifying twice-exceptional students (gifted w/learning disabilities). #gtchat
- 11:24 pm **GaryBrannigan:** There is a concern about false positives and negatives, especially with younger children. #gtchat
- 11:24 pm **DavidsonGifted:** @chrstinef So true. Very important to find someone who has experience with this population in order to gain valid measures. #gtchat
- 11:24 pm **DeborahMersino:** RT @DavidsonGifted: Hoagies Gifted does a great job explaining ceiling effects: http://www.hoagiesgifted.org/highly_profoundly.htm #gtchat
- 11:25 pm **ljconrad:** More education needed for staff and teachers regarding gifted kids! Our parents' group advocates for this constantly. #gtchat
- 11:25 pm **Frazzlld:** Where GT not provided for in ed system/psychs not trained, we rely on an IQ score over 130 to convince the powers that be. So wrong #gtchat
- 11:25 pm **chrstinef:** @ljconrad very very true! #gtchat
- 11:26 pm **Dazzlld:** @DavidsonGifted Thanks for links. Should a child be tested on another test if they reach many subtest ceilings? #gtchat
- 11:26 pm **GaryBrannigan:** I think that most psychologists are not trained on any other tests besides IQ tests to assess giftedness #gtchat
- 11:27 pm **DeborahMersino:** @GaryBrannigan Good point. I found Carolyn's article re group assessments intriguing. Some #gifted will get artificially low scores. #gtchat
- 11:27 pm **Frazzlld:** @ljconrad That's why parents like myself and @Dazzlld are so vocal here. We are starting from almost nothing #gtchat
- 11:28 pm **DavidsonGifted:** @ljconrad Yup. Keep pounding the drum. Its sometimes painfully slow progress, but progress nonetheless. One school/teacher at a time! #gtchat
- 11:28 pm **DeborahMersino:** Most widely used individual IQ tests for school-aged youngsters: WISC-III and Stanford-Binet Intelligence Test (SB-IV) via NAGC. #gtchat
- 11:29 pm **GaryBrannigan:** @DeborahMersino Group tests generally are not as reliable as individual tests. #gtchat
- 11:29 pm **ljconrad:** Teacher recommendations need to be given more consideration. #gtchat
- 11:29 pm **DeborahMersino:** @Frazzlld @Dazzlld - I feel for you. I do know some professionals like @DeborahRuf offer assessments worldwide. #gtchat
- 11:29 pm **DeborahMersino:** Agree! RT @GaryBrannigan @DeborahMersino Group tests generally are not as reliable as individual tests. #gtchat
- 11:30 pm **Boz23:** #gtchat I always recommend IQ tests to parents of 2E or similar but not for kids who are achieving well and recognised as gifted already
- 11:30 pm **DavidsonGifted:** What do the psychs think of the SB-LM? I have heard mixed reviews of the validity of such an old/outdated test due to Flynn effect #gtchat
- 11:31 pm **DeborahMersino:** "IQ is not the best measure or predictor for everyone or for all success measures." - Callahan/Eichner (so important to remember) #gtchat
- 11:31 pm **Frazzlld:** Important that a psych can decipher subscore discrepancies on an assessment and know when to use GAI instead of FSIQ for 2E #gtchat
- 11:31 pm **DeborahMersino:** @Boz23 - Makes sense. It should be all about serving the child, not getting a label. #gtchat
- 11:32 pm **DeborahMersino:** RT @Frazzlld: Important that a psych can decipher subscore discrepancies on an assessment and know when to use GAI instead of FSIQ for 2E #gtchat

an assessment and know when to use it instead of one for 2E #gtchat

- 11:32 pm **chrstinef:** @DavidsonGifted I don't love it. I tend to like more neurologically based, current tests #gtchat
- 11:32 pm **chrstinef:** @FrazzIld ABSOLUTELY! #gtchat
- 11:32 pm **Boz23:** #gtchat IQ tests don't recognise cultural giftedness - giftedness is culturally situated.
- 11:32 pm **FrazzIld:** @Boz23 Agree. Don't see the point of assessing a child who is doing well #gtchat
- 11:33 pm **DavidsonGifted:** @Boz23 Good point. Testing should only be done for a reason, not just to satisfy a curiosity or to try to score better than last time. #gtchat
- 11:33 pm **Boz23:** #gtchat Interesting that Flynn is in New Zealand but we don't use IQ tests in NZ schools!
- 11:33 pm **DeborahMersino:** @chrstinef - What do you use for what ages? #gtchat
- 11:34 pm **chrstinef:** @DavidsonGifted YEP! #gtchat
- 11:34 pm **FrazzIld:** @Boz23 What do you use? #gtchat
- 11:34 pm **DazzIld:** @Boz23 How are gifted learners identified in NZ schools? #gtchat
- 11:34 pm **chrstinef:** @DeborahMersino I like the CAS for most school-aged kids...in connection with other measures #gtchat
- 11:35 pm **DeborahMersino:** @Boz23 - Out of curiosity, what do you use relative to assessment in New Zealand? #gtchat
- 11:35 pm **Boz23:** #gtchat @DavidsonGifted Guess I still suffer from childhood comparisons with my 'genius' cousin - IQ 160 plus - it was a conversation piece.
- 11:36 pm **DavidsonGifted:** @chrstinef Thanks. Scores on the LM can be so high, but scores on SB IV or V are lower and people get worried. They are not comparable #gtchat
- 11:36 pm **GiftedHF:** RT @DavidsonGifted: Hoagies Gifted does a great job explaining ceiling effects: http://www.hoagiesgifted.org/highly_profoundly.htm #gtchat
- 11:36 pm **DeborahMersino:** Our school district uses CoGAT. One dd did exceptionally well; the other (2E) didn't (except in one area) #gtchat
- 11:37 pm **chrstinef:** @DavidsonGifted very true #gtchat
- 11:37 pm **inkwellHQ:** RT @FrazzIld: @Boz23 Agree. Don't see the point of assessing a child who is doing well #gtchat > me too, agree there!
- 11:37 pm **DazzIld:** @Boz23 That's why I would be reluctant to discuss my kids scores with them..it's just a snapshot on a given day #gtchat
- 11:37 pm **Boz23:** #gtchat Always a range of identifiers - parents, peers, school checklists based on each school's unique identity, cultural indicators...
- 11:38 pm **DeborahMersino:** Hi @GiftedHF - Glad you're here! #gtchat
- 11:39 pm **Boz23:** #gtchat ...Teacher observation scales, Teacher judgement - only effective if teachers have had PD in gifted and now that's not happening.
- 11:39 pm **GaryBrannigan:** I try not to even mention the words "smart" or "intelligent". I focus on effort attributions #gtchat
- 11:39 pm **DeborahMersino:** "An IQ score should never be the sole basis used in determining giftedness & minimum cut-offs should not be used." Callahan/Eichner #gtchat
- 11:39 pm **FrazzIld:** I know 1 who was deemed not gifted on FSIQ of 127 at age 6! Turned out on reassessment 7 years of heartache later, he is 2E #gtchat
- 11:39 pm **inkwellHQ:** @DazzIld @GiftedHF Had never even considered levels of giftedness . Yikes #gtchat
- 11:40 pm **chrstinef:** @GaryBrannigan wise #gtchat
- 11:40 pm **Ijconrad:** Assessment is the only way to get any enrichment or services here and IQ is

- 11:40 pm **DeborahMersino:** Early intervention and identification, though, can help with ensuring the optimal learning environment. (Paraphrase Silverman) #gtchat
- 11:41 pm **Boz23:** #gtchat Understanding levels of giftedness was a huge revelation for me.
- 11:41 pm **DazzlId:** So if we can't compare between tests, are schools experienced enough to distinguish higher LM scores and lower WISC and SB4/5 #gtchat
- 11:42 pm **DeborahMersino:** Silverman: By age of 9, highly gifted children may hit the ceiling of the tests & gifted girls may be socialized to hide abilities #gtchat
- 11:42 pm **FrazzId:** @DeborahMersino Hence my extreme frustration with the psych who didn't spot it at age 6, even though the right question was asked #gtchat
- 11:43 pm **Boz23:** #gtchat NZ schools are self-governing so each school is responsible for its own ID and programming - pluses and minuses
- 11:43 pm **FrazzId:** @DazzlId In this country? Are you kidding?!!! #gtchat
- 11:43 pm **DeborahMersino:** Regarding @DeborahRuf - Her site talking about levels of giftedness can be found at www.educationaloptions.com. #gtchat
- 11:44 pm **GiftedHF:** @DeborahMersino Hi, Deborah -- I'm multitasking :-) #gtchat
- 11:44 pm **DeborahMersino:** @FrazzId - I was grateful that Northwestern Center for Talent Development had/has screenings for age 4 & up for its programs. #gtchat
- 11:45 pm **DazzlId:** @Boz23 Sounds good in theory! How do kids qualify for your one-day schools? Regular school recommendation? #gtchat
- 11:45 pm **FrazzId:** @DeborahMersino I believe @DeborahRuf is about to launch a new online assessment #gtchat
- 11:45 pm **DavidsonGifted:** @DazzlId Hopefully the person making a determination for services can. It is not that can't compare but 160 on SBIV is not 160 on LM #gtchat
- 11:45 pm **DeborahMersino:** Many of you may already know this, but second children are recognized as gifted much less frequently than first-borns/only children. #gtchat
- 11:47 pm **DeborahMersino:** @FrazzId - Yes, she is...will be very cost-effective. #gtchat
- 11:47 pm **FrazzId:** @DeborahMersino My 2nd didn't like the psych who assessed her as she called her "slow". She took it to mean stupid and clammed up! #gtchat
- 11:48 pm **DeborahMersino:** Gifted/learning-disabled children & visual-spatial learners usually have at least one parent w/same learning pattern. -Silverman #gtchat
- 11:48 pm **DazzlId:** @DeborahMersino Lol, I'm a second (middle!) child so I am a champion of my second son, different but just as gifted! #gtchat
- 11:49 pm **Boz23:** @DazzlId #gtchat Schools recommend for ! day programmes but not all schools buy into them. They are private institutions - there is a cost.
- 11:49 pm **DeborahMersino:** @FrazzId - So sorry to hear that. Rotten assessor! #gtchat
- 11:50 pm **Boz23:** @DeborahMersino #gtchat I suspect many 2nd chn have diverse gifts - eg creative - not picked up by IQ tests.
- 11:50 pm **DeborahMersino:** Do any of you know much about WPPSI-III? #gtchat
- 11:50 pm **Boz23:** #gtchat IQ tests are terrible for high creatives.
- 11:51 pm **DeborahMersino:** @Boz23 - I suppose that's why I'm a fan of Dr. Silverman. She identifies visual-spatial, etc. www.gifteddevelopment.com. #gtchat
- 11:51 pm **GaryBrannigan:** @Boz23 IQ tests do not assess divergent thinking. #gtchat
- 11:52 pm **DazzlId:** RT @Boz23: #gtchat IQ tests are terrible for high creatives./ I agree, not much room for the zanier brain. #gtchat
- 11:53 pm **GiftedHF:** What she said. --> RT @mygiftedgirl: @DeborahMersino Thanks again! Been watching although still caught up in advocacy work. #gtchat

Transcript for #gtchat - What the Hasht...

- 11:53 pm **chrstinef:** @DeborahMersino Honestly - not a fan (of any of the Wechsler IQ tests) #gtchat
- 11:53 pm **DeborahMersino:** Re advocacy, tho, the more egalitarian gifted programs attempt to be, the less defensible they are - Silverman. {True.} #gtchat
- 11:54 pm **FrazzIld:** Linda Silverman is one of my heroes. Learned a lot from her books/website <http://www.gifteddevelopment.com/> #gtchat
- 11:54 pm **cybraryman1:** @DazzIld Do IQ test measure common sense. I know a lot of brilliant people who lack it! #gtchat
- 11:54 pm **FrazzIld:** RT @GaryBrannigan IQ tests do not assess divergent thinking. #gtchat
- 11:54 pm **DeborahMersino:** @chrstinef - Oldest took it at 5 - scored gifted, but very low processing quotient. #gtchat (could be the 2E, could be the test)?
- 11:54 pm **GaryBrannigan:** @DeborahMersino Good point. the programs that include the most children will likely get the most support #gtchat
- 11:55 pm **chrstinef:** @DeborahMersino Gotta go...great chat as always! #gtchat
- 11:55 pm **DazzIld:** @cybraryman1 Too true! #gtchat

- 11:56 pm **DeborahMersino:** @GaryBrannigan Actually, we see the opposite. The definition of giftedness is getting so broad, it's harder to defend. Make sense? #gtchat
- 11:57 pm **FrazzIld:** RT @DeborahMersino: The definition of giftedness is getting so broad, its harder to defend. Make sense?...Perfect! #gtchat
- 11:57 pm **DazzIld:** Still comes down to advocacy in the end, an IQ score is just a starting point to provide appropriate education #gtchat
- 11:58 pm **Ijconrad:** Learned a lot tonight! Can we chat more about 2E in the future? #gtchat
- 11:58 pm **DeborahMersino:** Thank you everyone for another insightful #gtchat. Grateful we had psych pros with us for this discussion.
- 11:58 pm **GaryBrannigan:** @DeborahMersino I was actually referring to defense of programs that involve a lot of children - which some schools advocate #gtchat
- 11:58 pm **FrazzIld:** True RT @DazzIld: Still comes down to advocacy in the end, an IQ score is just a starting point to provide appropriate education #gtchat
- 11:58 pm **Boz23:** #gtchat Giftedness is like creativity - amorphous and in the end probably impossible to define. I like Gagne's model.
